

MIKE

MULTI-USE INFLATABLE KAYAK (EXPEDITION SPEC)

Length: 4m
13ft

Width: 112cm
44in

Weight: 32kg
70lb

Tube Diameter: 35cm
14in

Rocker: 55cm
21.5in

This guy has more uses than a multi-tool. This inflatable kayak can be packed down, hiked in, paddled solo or with the family. Hucked down staunch white water or cruise along your favourite lake. It's set up for extended expeditions with room and tie down points for ample gear. You can even paddle it with a canoe or kayak paddle.

FEATURES

- Tough armour on the bottom and sides on top of .9mm pvc, for serious puncture protection.
- Thick I Beam floor that extends all the way to the ends. This increased buoyancy in the ends means quick drainage of water to the self bailing holes improving performance in white water.
- Adjustable 3 position seats, to easily regulate the boats trim. Enabling good performance whatever the load configuration may be.
- 8 D-ring attachment points to tie in gear for expedition trips. 4 in the front and back.
- Comes Rigged with reflective rope - outside line and bow line.
- Lots of rocker for great paddling performance in white water. With a high bow, MIKE is less likely to get swamped with water. Keeping great manoeuvrability through rapids.
- Very stable, its width is a perfect balance for stability and manoeuvrability.
- Built to ISO 6185-1 international standard for inflatable boats.

WARRANTY – 2 year on material and workmanship. Does not cover damage through use.
